

**I-95 / MD 222
Concept Study**

December 27, 2011

The Honorable Diana Broomell
Cecil County Board of County Commissioners
County Administrative Building, Suite 2100
200 Chesapeake Boulevard
Elkton, MD 21921

Dear Ms. Broomell:

The Maryland Transportation Authority (MDTA) in partnership with the State Highway Administration (SHA) and the Maryland Department of Transportation (MDOT) has undertaken a concept study to identify future improvements at the I-95/MD 222 interchange and along MD 222 in the vicinity of the interchange.

The purpose of this letter is to inform you of our third Work Group Meeting, scheduled for January 30, 2012 from 1:00 PM to 3:00 PM.

Since our second Work Group meeting in January, 2011, the study team has refined the roadway concepts and developed estimated project costs. The purpose of this third and final meeting is to present to the Work Group the findings of the concept study, construction phasing options, project costs, and potential funding mechanisms, as well as, to discuss the steps needed for future project progress.

As a Work Group Member, we hope you will be able to provide feedback to the project team on the roadway improvement needs, construction phasing options, and potential funding mechanisms. If you wish to solicit information from other officials or interested parties prior to the meeting we encourage you to do so. We would appreciate any and all feedback you might provide on the concept study to date.

It should be noted that this study is not a National Environmental Policy Act (NEPA) study. Funding is programmed for a concept study only. In the future if sources are identified, a full NEPA study would need to be completed before the project could move into the design, right-of-way acquisition and construction phases.
