

Final Lot Grading Plan Certifications

Plan Certification

I certify that I am qualified to design stormwater management and grading plans and that the site grading as shown hereon does not involve the redirection of stormwater runoff off of the site or concentrate the release of stormwater runoff in an off-site area that previously received non-concentrated flow. The grading and stormwater management strategies shown hereon meet or exceed the requirements contained within the Cecil County Stormwater Management and Soil Erosion and Sediment Control Ordinances. If the project site is included in a currently approved and valid stormwater management and/or erosion and sediment control plan, the best management practices and strategies utilized on this lot grading plan are consistent with, and meet the intent of those plans.

Professional Certification

I hereby certify that these documents were prepared or approved by me, and that I am a duly licensed professional engineer under the laws of the State of Maryland, License No. (*No.*), Expiration Date: (*date*).

Owner/Developer Certification

I hereby certify that all land clearing, construction, development and grading will be done pursuant to this plan. I understand that no work will be initiated at the site until a preconstruction meeting has been held with Department of Public Works officials. I also understand that it is my responsibility to have the construction supervised and certified, including submittal of an as-built plan, by a registered professional engineer prior to a final grading inspection or approval of the certificate of occupancy.
