Re: Asbuilt Lot Grading Plan Review Checklist Revisions

The asbuilt final lot grading plan review checklist and asbuilt plan certification have been revised to be consistent with the final lot grading plan review checklist and certification. Note that the revised checklist will now require an owner/developer certification and a DPW approval block on the plan. The revised checklist, certifications and approval block have been posted on the Sediment & Stormwater Branch website under the Forms and Codes section. The direct link to the forms and codes section is http://www.ccgov.org/dept_works/sediment_stormwater_forms.cfm.

All lot grading asbuilt plans must be submitted in accordance with the revised checklist starting October 13, 2009. This revision will be discussed at the upcoming roundtable meeting which will be held on October 2, 2009 in the County Administration Building, 200 Chesapeake Blvd., Elkton, MD 21921. The meeting will be held in the Elk Room and begins at 2:00pm.

If you have any questions feel free to contact me at 410-996-5265 or by e-mail at vfunk@ccgov.org.
