

Annual Water Quality Report For Meadowview/Highlands Water System

To our valued customers,

As you are aware, we provided you with our 2010 Annual Water Quality Report earlier this month. We recently discovered a typographical error within the report, specifically on page 4 of 7 and within the contaminants table. The error that was present within your received copy states that the Chloroform MCL and MCLG are both 0.7 ppb, which was mistakenly reported as such. The values that should have been reported are N/A for MCL and 70 for MCLG.

This typographical error has since been rectified and as you can see within the water quality report posted here, the correction has been made.

We sincerely appreciate your cooperation and should you have any questions or concerns, please feel free to contact us at 410.996.6260.

Thank You,
Cecil County Department of Public Works
Water and Wastewater Division
