COUNTY COUNCIL OF CECIL COUNTY, MARYLAND
LEGISLATIVE SESSION DAY 2020-03

RESOLUTION NO. 07-2020 (As Amended)

Title of Resolution: Amendment - Master Water and Sewer Plan – Town of North East and Artesian Water

Synopsis: A Resolution to amend the Cecil County Master Water and Sewer Plan, Chapter 3 Water Systems, Section 3.2.6 North East; Section 3.2.9 Artesian Water Maryland, Inc.; Section 3.2.10.3 Elkton West/Meadowview Water System; Section 3.2.10.6 Route 7 Water System; Appendix D. Water System Maps; Appendix F. Agreements Incorporated by Reference; and Appendix G. Town of North East and Artesian Water Maryland, Inc. Non Exclusive Water Service Areas; in order to reflect the June 2019 agreement, which supersedes a June 2018 agreement, with the establishment of an additional interconnection between the Town and Artesian on the east side of the Town in order to enable Artesian to purchase up to 200,000 gallons per day from the Route 40 east interconnection.

Introduced by: Council President on behalf of the Department of Land Use and Development Services

Introduced and ordered posted on: February 4, 2020

Public Hearing scheduled on: March 3, 2020 at 7:00 p.m.

Scheduled for consideration on: March 17, 2020

By: James Massey
Council Manager

PUBLIC HEARING

Notice of time and place of public hearing and title of Resolution, having been posted by February 4, 2020 at the County Administration Building, 200 Chesapeake Blvd., Elkton, and having been published according to the Charter on February 19, 2020 and February 26, 2020, a public hearing was held on March 3, 2020 and concluded on March 3, 2020.

By: James Massey
Council Manager

EXPLANATION: CAPITALS INDICATE LANGUAGE ADDED TO EXISTING RESOLUTION
Strike-through indicates language deleted from existing Resolution
Underlining indicates language added to Resolution by Amendment
Double Strike-through indicates language stricken out of Resolution by Amendment.
WHEREAS, pursuant to Section 9-503 of the Environment Article of the Annotated Code of Maryland, each County is required to have a Master Water and Sewer Plan, and to provide for the administration, enforcement and amendment of the Plan; and

WHEREAS, pursuant to section 9-503 of the Environment Article, each county's governing body has the authority to review, revise or amend the Master Water and Sewer Plan; and

WHEREAS, amendments have been proposed by the Town of North East and Artesian Water to the Master Water and Sewer Plan, Chapter 3 Water Systems, Section 3.2.6 North East, Section 3.2.9 Artesian Water Maryland, Inc., Section 3.2.10.3 Elkton West/Meadowview Water System, Section 3.2.10.6 Route 7 Water System in order to suspend the interconnection agreement Town of North East and Artesian Water Maryland, Inc. that was executed in January 2018 and replace it with an agreement executed in June 2019 that includes an additional interconnection between the Town of North East and Artesian Water Maryland, Inc. on the east side of the Town that would enable Artesian to purchase up to 200,000 gallons per day from the Route 40 east interconnection; and

WHEREAS, an amendment has been proposed to Appendix D. Water System Maps of the Master Water and Sewer Plan to delete map 19, North East – Water Service Districts 2018 Cecil County Master Water Plan and insert map 19, Artesian East of the Town; and

WHEREAS, an amendment has been proposed by Artesian Water to the Master Water and Sewer Plan to amend Appendix F. Agreements Incorporated by Reference in order to insert the Interconnection Agreement between Artesian Water Maryland, Inc. and the Mayor and Commissioners of the Town of North East, dated June 26, 2019; and

WHEREAS, an amendment has been proposed by Artesian Water to Appendix G. Town of North East Water Service Area and Artesian Water Maryland, Inc. Non Exclusive Water Service Area of the Master Water and Sewer Plan to delete Non Exclusive and Town of North East Water Service Area & Artesian Water Maryland, Inc. Non Exclusive Water Service Areas Map; and insert Town of North East Water Service Agreement for the Elkton West Area by and between Cecil County, Maryland and Artesian Water Maryland, Inc.; and

WHEREAS, the Division of Planning and Zoning of the Department of Land Use and Development Services has recommended approval of this amendment to the Master Water and Sewer Plan; and

WHEREAS, a public hearing was held on these proposed amendments before the Planning Commission on January 22, 2020; and
WHEREAS, the Planning Commission determined that the text and map amendments are consistent with the County's Comprehensive Plan; and

WHEREAS, before the county governing body adopts any revision or amendment of its county plan, the governing body must conduct a public hearing; and

WHEREAS, all requirements of the Environment Article of the Annotated Code of Maryland have been met with regard to the amendment of the Cecil County Master Water and Sewer Plan.

NOW, THEREFORE, BE IT HEREBY RESOLVED BY THE COUNTY COUNCIL OF CECIL COUNTY, MARYLAND, that the text amendment to the Master Water and Sewer Plan, Chapter 3, Water Systems is hereby adopted as follows:

Section 3.2.6 North East

A. Existing System

The Town of North East presently owns and operates two water treatment plants (WTP), the Rolling Mill WTP and the Leslie WTP. The combined maximum design treatment capacity is 2.83 million gallons per day. The water system presently provides potable water and fire protection to a population of approximately 8,965 people and to the Maryland Transit Authority Rest Stop on Interstate 95.

IT ALSO PROVIDES WATER TO ARTESIAN WATER VIA AN INTERCONNECTION ON RED TOAD ROAD. A combination of five elevated and three underground storage tanks provide a total reserve of approximately 2,960,000 gallons.

(intentionally left blank)

The Rolling Mill WTP is rated at 2.0 million gallons per day.

The capacity was obtained with the intention of meeting the future water needs of the Town and the Town’s Growth Area through the year 2030.

The Rolling Mill WTP is a package surface water treatment plant with two separate filter trains and has provisions for a future third filter unit. As part of the Rolling Mill WTP, a raw water pumping station near the mouth of the North East River allows the Town to pump water from the river and discharge it into the raw water reservoir at the Rolling Mill WTP. This pumping station is used under severe drought conditions and other emergencies.

(intentionally left blank)

Using chlorine dioxide, flocculants, and ultraviolet disinfection, The Leslie WTP has a capacity to treat 830,000 gallons per day. During periods of significantly low flow in the North East River, and when the raw water pumping station is in use, the Leslie WTP will not operate.

The design of the Rolling Mill
WTP allows transfer of water to the higher pressure zones currently served by the Leslie WTP.

(intentionally left blank)

B. Proposed Improvements

The Town of North East’s priorities for improvement of the water system include:

WORK IN PROGRESS

1) Rehabilitate Irishtown Road water booster pump station;
2) Rehabilitate the Razor Strap Road water booster pump station;
4 1) Install powder activated carbon additions at both water treatment plants;
5 2) Install tank mixers in finished water storage tanks;
6 3) Dredge the raw water pond at the Leslie water treatment plant;
3 4) Replace the Rolling Mill finished water booster pump station;
7) Perform various SCADA upgrades;
8) Construct a new water storage tank and booster pumping station to serve Zone 3; and
9) Install a third filter at the Rolling Mill WTP to provide for future expansion.

ADDITIONALLY, THE TOWN HAS COMPLETED AN UPDATED 20-YEAR CAPITAL IMPROVEMENT STUDY.

THIS STUDY HAS IDENTIFIED AND EVALUATED POTENTIAL CAPITAL IMPROVEMENTS THAT WILL NEED TO BE COMPLETED OVER THE NEXT 20 YEARS.

FUTURE PROJECTS:

5) REHABILITATE IRISHTOWN ROAD WATER BOOSTER PUMP STATION;
6) REHABILITATE THE RAZOR STRAP ROAD WATER BOOSTER PUMP STATION;
7) VARIOUS WATER MAIN REPLACEMENT PROJECTS.
8) REHABILITATE/REPLACE LESLIE WTP RAW WATER PUMP STATION;
9) ADDITIONAL WATER STORAGE TANK TO SERVE ZONE 2;
10) PERFORM VARIOUS SCADA UPGRADES;
11) CONSTRUCT A NEW WATER STORAGE TANK AND BOOSTER PUMPING STATION TO SERVE ZONE 3; AND
12) INSTALL A THIRD FILTER UNIT AT THE ROLLING MILL WTP TO PROVIDE FOR FUTURE EXPANSION.

C. Service Area Agreements

The Town and the County have entered into various agreements during the last four decades. In November 1972, the Town and County entered into an agreement outlining the scope of the Town’s
responsible for the service area on the periphery of the Town. Subsequent agreements were entered
previous agreements. Cecil County Government has also permitted the Town to serve portions of
Candlelight Ridge and Bedrock Subdivisions.
(intentionally left blank)
In January 2018, the Town and Artesian Water Maryland, Inc. finalized an interconnection agreement that
would enable Artesian to purchase a minimum of 35,000 gallons a day from the town, with the option to
eventually increase that amount to as much as 150,000 gallons. **IN 2019, THE INTERCONNECTION
INFRASTRUCTURE ON RED TOAD ROAD WAS CONSTRUCTED AND SERVICE BEGAN TO BE PROVIDED. IN
JUNE 2019, A REVISED AGREEMENT WAS EXECUTED WITH ARTESIAN WATER WHICH SUPERSEDES
THE 2018 AGREEMENT. THIS REVISED AGREEMENT ALLOWS ARTESIAN WATER TO TAKE UP TO 350,000
GALLONS PER DAY, WHICH INCLUDES A SECOND CONNECTION FROM THE BAY BERRY TANK. As of this
writing (late 2018), the actual interconnection infrastructure (proposed to be located on Red Toad Rd)
has yet to be constructed. According to the agreement, Artesian will pay all costs associated with
construction of the interconnection infrastructure, but the Town will own and maintain the
interconnection point.
SHOULD THE TOWN RECEIVE A REQUEST TO EXPAND THE AGREEMENT BEYOND 350,000 GALLONS PER
DAY, SOME OF THE PROJECTS NOTED ABOVE WILL NEED TO BE COMPLETED TO MEET THE REQUEST.
Section 3.2.6 Service Area Agreements
C. **IN JUNE 2019, THE TOWN AND ARTESIAN WATER MARYLAND, INC. EXECUTED A SUBSEQUENT
INTERCONNECTION AGREEMENT THAT SUPERSEDED THE JANUARY 2018 AGREEMENT WITH THE
ESTABLISHMENT OF AN ADDITIONAL INTERCONNECTION BETWEEN ARTESIAN AND THE TOWN ON THE
EAST SIDE OF THE TOWN THAT WOULD ENABLE ARTESIAN TO PURCHASE UP TO 200,000 GALLONS PER
DAY FROM THE ROUTE 40 EAST INTERSECTION INTERCONNECTION.**
(intentionally left blank)
D. Water Service Areas
The water service area maps in Appendix D show the various service area categories.
**3.2.9 Artesian Water Maryland, Inc.**
Section A. **Introduction to Artesian Water Maryland**
A SUBSEQUENT INTERCONNECTION AGREEMENT WAS EXECUTED IN JUNE 2019 BETWEEN THE TOWN OF NORTH EAST AND ARTESIAN WATER MARYLAND THAT ESTABLISHED AN ADDITIONAL INTERCONNECTION EAST OF THE TOWN AT ROUTE 40 THAT MAKES AN ADDITIONAL 200,000 GALLONS PER DAY AVAILABLE TO ARTESIAN.

Section 3.2.10.3 Elkton West/Meadowview Water Systems

B. Proposed Improvements

There have been various businesses, developers, and homeowners within Cecil County that have a growing need for a reliable source of water service. Some have production wells that are dropping in capacities, and others are looking to develop land due to the increasing interest in development within Cecil County. Artesian has plans to expand infrastructure throughout the County to prepare for this future growth, as well as to provide reliable water supply and fire protection to existing and future customers. Appendix H depicts the proposed major main extensions and facilities for the area known as "Elkton West," which extends from the Maryland/Delaware State line, to Bouchelle Road / Mechanics Valley Road. Artesian Water Maryland proposes to add another 12 inch diameter main on the north side of Interstate 95. A 12 inch main will extend north near Appleton Road, crossing under Interstate 95, and connect to the southern portion of the Meadowview system along Airport Road in the Appleton Business Park.

In order to have redundant supply and looped systems, Artesian Water Maryland also proposes a 12 inch diameter main on the northern side of Interstate 95 to connect the Route 213 main to the Meadowview system. This main would extend east along Johnstown Road, through the proposed subdivision of Baldwin Mills, along Fletchwood Road, crossing the Elk River, and eventually connecting to an existing 10-inch diameter main on the Meadowview system.

Continuing off of the extended 20 inch diameter main, Artesian Water Maryland would extend a 12-inch diameter main south from the Interstate 95/Route 213 intersection to the Elkton town limits where a flow control valve and meter would be placed in an underground concrete pit should the Town of Elkton desire an interconnection. An additional benefit to the interconnection would be availability of water service to property owners along Ricketts Mill Road.

(intentionally left blank)
Moving west of Elkton, Artesian Water Maryland would extend water service from the Route 213/Interstate 95 intersection parallel to Interstate 95 to Blue Ball Road. The main would then turn south along Blue Ball Road until intersecting with Route 279, where it would then continue south along Route 279 until it tied into an existing interconnection at Route 7. It is here that Artesian currently serves residents via an interconnection with the Town of Elkton. This area, being part of the Artesian Water Maryland franchise, would be connected to the system via this main extension.

The proposed main along Blue Ball Road will also serve future subdivisions. One such subdivision is known as Dogwood. In the vicinity of the Dogwood subdivision, Artesian Water Maryland proposes to add an elevated water storage tank on the system. The construction of a 1 MG water storage tank would provide for more consistent water pressure, continued service in the event of power outages, additional supply for peak demands, and fire protection.

There are several large proposed subdivisions that will be served from the main extension on Blue Ball Road. The largest of the proposed subdivisions is called Heron Lake. This subdivision received preliminary approval to have approximately 4,000 service connections. Another main is proposed to extend from the rear of the Heron Lake subdivision to Marley Road. This proposed main will run south along Marley Road to the intersection of Nottingham Road, and then continue north along Nottingham Road until it comes to the railroad crossing.

Near this railroad crossing, Artesian Water Maryland proposes to construct a 1 MG elevated storage tank. This tank is to support further residential, commercial, and industrial growth in the area. This proposed tank location is in the westernmost part of Artesian Water Maryland's Elkton West franchise territory. Artesian Water Maryland then proposes, via an easement with the CSX Railroad Company, to extend this water main parallel to the railroad and to connect to the existing Mountain Hill water system at Baron Road.

On the northernmost portion of the Meadowview system, there is a proposed subdivision called Aston Pointe. A main is proposed to extend from the Highlands to Aston Pointe. A 1 MG elevated storage tank is proposed for construction in the Aston Pointe area. This tank will stabilize water pressures and provide fire protection for the area. The County previously applied for a groundwater appropriation permit for the wells located in the Aston Pointe subdivision. MOE
determined that a groundwater appropriation permit in the amount of 0.244 MGD average annual appropriation and 0.355 MGD for the month of maximum use would be issued provided a recharge easement is executed for the full golf course property in the subdivision. A Groundwater Allocation Permit (GAP) issued to the County (CE2005G005(01)) was transferred to Artesian Water Maryland concurrent with final transfer of other assets of the system.

Water supply capacity in this system has been substantially expanded by execution of the Interconnection Agreement with Artesian Water. Incremental water supply capacity increases will also be implemented through groundwater well permitting and development described above.

**ARTESIAN AND THE TOWN OF NORTH EAST EXECUTED AN INTERCONNECTION AGREEMENT IN JUNE 2019 TO PROVIDE UP TO 200,000 GALLONS PER DAY TO THE ELKTON WEST SERVICE AREA.**

Artesian also anticipates executing an interconnection agreement with the Town of North East to provide an additional source of supply to the western portions of this service area at a location near the intersection of Routes 40 and 272.

Maps in Appendices D and H show the location of the Meadowview/Elkton West service area.

**Section 3.2.10.6 Route 7 Water System**

**A. Existing System**

The Route 7 water system is located in the vicinity of the Route 7-Route 40 intersection. There are approximately 24 customers on this system. Supply for this system is provided by the interconnection with the Town of Elkton on Route 279. At this interconnection, Artesian can purchase up to 8,000 gpd from the Town. The Route 7 system is for distribution only. Therefore, no treatment or storage is required or provided. The system presently utilizes an average of approximately 4,400 gallons per day, 55% of the allowable amount per the agreement with the Town of Elkton.

**B. Proposed Improvements**

The Route 7 system will be connected to another source of supply to the south of Artesian's service territory in the Route 7 area. This source of supply is anticipated to be located on a parcel
owned by Artesian Water Maryland on Oldfield Point Road (Cooke parcel). This source of supply will also be connected to Artesian Water Maryland's Pine Hills' water system.

Artesian HAS EXECUTED an interconnection agreement with the Town of North East to provide an additional source of supply to this service area at a location near the intersection of Routes 40 and 272.

C. Service Area
Maps in Appendices D and H show the location of the Route 7 service area on the Meadowview maps.

AND, BE IT FURTHER RESOLVED BY THE COUNTY COUNCIL OF CECIL COUNTY, MARYLAND, that these amendments to the Master Water and Sewer Plan shall be submitted to the Maryland Department of the Environment for its approval pursuant to §9-507 of the Environmental Article of the Annotated Code of Maryland.

AND, BE IT FURTHER RESOLVED BY THE COUNTY COUNCIL OF CECIL COUNTY, MARYLAND, that this Resolution shall take effect on the date of its passage.
